CSE 111

Fall 2010

November 15 – 19

ANNOUNCEMENTS

- This week in lab: No new assignment – time to finish up any remaining issues with Labs 4, 5, 6.
  - All three are due at the same time, but starting them all the day before they are due is NOT recommended
  - They are due November 28th
    - This is the Sunday at the end of Thanksgiving break – don't count on anyone being available for help Wednesday through Sunday.

ANNOUNCEMENTS

- Monday, November 22nd – lectures will not meet. Instead, I will be holding office hours all day to assist with any last-minute issues with the Scratch assignments. If you are coming for help with Scratch, you must bring your files with you. I don't have access to your UB filespace from my office.

Artificial Intelligence

- Agents
  - ↳ Robots
  - ↳ airplane
  - ↳ car
  - ↳ characters in video games

Turing Test

A human interrogator communicates via a keyboard with a test subject. If the interrogator believes the test subject is human when it really is a computer, the A.I. passes the Turing Test.

WHAT DOES THE COMPUTER SEE?
