

CSE 113 A

January 17 – 21, 2011

Welcome

⚙ Please make sure you get a copy of the syllabus (extra copies are available at front).

CSE 113 – Introduction to Computer Programming I

⚙ Instructor:

⚙ Dr. Adrienne Decker

⚙ Office: 130 Bell Hall

⚙ Email: adrienne@buffalo.edu

⚙ Email you send me should be from your UBIT email account and should include your full name and which course you are taking.

CSE 113 – Introduction to Computer Programming I

⚙ Office Hours:

⚙ Monday 10:30–11:20

⚙ Wednesday 10:00–11:20 and 2:00–2:50

⚙ Friday 2:00–2:50

Information on the Web

- ⊗ All course content will be on the course website:
- ⊗ <http://www.cse.buffalo.edu/faculty/adrienne/SP2011/cse113>
- ⊗ UBLearns will be used to post course grades

University of Buffalo, The State University of New York

CSE 113 - SPRING 2011

COMPUTER SCIENCE AND ENGINEERING

INTRODUCTION TO COMPUTER PROGRAMMING

Lectures

Section	Day	Time	Room	Instructor
A	Mon, Wed, Fri	12:00pm - 12:50pm	220 NSC	Adrienne Decker
B	Mon, Wed, Fri	1:00pm - 1:50pm	220 NSC	Adrienne Decker

Recitations

*** All recitations meet in 340 Bell ***

Section	Day	Time	TA
A1	Tuesday	1:00pm - 2:50pm	TBA
A2	Wednesday	4:00pm - 5:50pm	TBA
A3	Thursday	11:00am - 12:50pm	TBA
A4	Friday	1:00pm - 2:50pm	TBA
B1	Tuesday	11:00am - 12:50pm	TBA
B2	Wednesday	11:00am - 12:50pm	TBA
B3	Thursday	1:00pm - 2:50pm	TBA
B4	Friday	3:00pm - 4:50pm	TBA

Course Structure

- ⊗ Lecture (3 hours each week)
- ⊗ Recitation (2 hours each week)
 - ⊗ You should be registered for a recitation section and a lecture.
 - ⊗ **Recitations do not meet this week.**
- ⊗ If you are interested in changing your recitation section and are unable to do so through the registration system, please fill out Recitation Change Request Form.

Course Description and Prerequisites

- ⊗ This course is an introduction to computer programming for non-majors. Intended computer science or computer engineering students should not take this course.
- ⊗ There are no prerequisites for this course, but you should have some familiarity with a computer (that is, you should have used one before).

Textbook

- ⊗ Michael Kölling – Introduction to Programming with Greenfoot: Object-oriented Programming in Java with Games and Simulations
- ⊗ The package (paper book and eBook) is available at the University Bookstore, Greeks and Sneaks.
- ⊗ The paper book is available through many outlets.

Computing Resources

- ⊗ Projects for this course will be completed on the School of Engineering's computer systems.
- ⊗ You will be receiving an account on these systems.

Course Grades

⚙ 45% - Exams

⚙ Four in-class exams – lowest grade dropped. Dates posted already on the course website.

⚙ 35% - Programming Exams (3)

⚙ Two take place in recitation during the semester, one during final exam week. Dates listed in syllabus and on course website.

Course Grades

⚙ 20% - Programming Assignments

⚙ Ten assignments each worth 1.5% of your grade. One to ten practice assignments worth a total of 5% of your course grade.

Course Grades

⚙ Important Note:

- ⚙ If you do not attempt the third practical exam (or are not allowed to take the third practical), the highest grade you can earn in the course is an F.
- ⚙ You will not be allowed to take the third practical exam if your grade on ANY of the ten programming assignments is below 50%.

Letter Grades

- ⚙ See chart in syllabus.
- ⚙ There is no curve on the course grades. If your average falls in between the cutoffs, that is your grade.

Course Policies

- ⚙ Re-grading – any questions about graded work must be raised within one week of the return of the work.
- ⚙ Incompletes – we will follow the university's policy on incompletes – unless you meet the criterion, you will not get an incomplete.

Course Policies

- ⚙ Disability Services – If you are registered, please bring me the letter indicating your accommodations.
- ⚙ Athletics – If you are an athlete, please come to speak with me about how that will effect this course this semester.

Course Policies

⊗ Disruption/Behavior in the Classroom

- ⊗ Take note of the University's policy on this issue (in syllabus)
- ⊗ Be respectful of each other

Course Policies

⊗ Academic Integrity

- ⊗ Breaches of academic integrity will be investigated and punishments imposed in accordance with the University's policies AND my department's policies.
- ⊗ My department's policy is that ANY breach of academic integrity is punished with an F in the course (no more lenient punishments allowed).

Syllabus Confirmation

- ⚙ You need to go to UBLearns and complete the syllabus confirmation “test” that is now available in the course.
- ⚙ Failure to complete this “test” will render you ineligible to take the third practical exam.
- ⚙ You have until the end of the day, Monday, January 31, 2011 to complete the “test”.

FAQ

- ⚙ Where are the slides posted?

Answer

Course notes (slides) are posted here at the END of each week...

Recitations

*** All recitations meet in 340 Ball ***

Section	Day	Time	TA
A1	Tuesday	1:00pm - 2:50pm	TBA
A2	Wednesday	4:00pm - 5:50pm	TBA
A3	Thursday	11:00am - 12:50pm	TBA
A4	Friday	1:00pm - 2:50pm	TBA
B1	Tuesday	11:00am - 12:50pm	TBA
B2	Wednesday	11:00am - 12:50pm	TBA
B3	Thursday	1:00pm - 2:50pm	TBA
B4	Friday	3:00pm - 4:50pm	TBA

CSE 113 - Announcements

- ⊗ Pick up (and READ) syllabus if you have not already done so.
- ⊗ No recitations meet this week.
- ⊗ Recitation change form (if you are interested in changing your recitation day/time).
- ⊗ Syllabus Confirmation “test” on UBLearn needs to be completed by 1/31/11.

What is Programming Like?

- ⊗ Structured
- ⊗ Specific
- ⊗ Detail-oriented
- ⊗ Organized
- ⊗ Well-thought out
 - ⊗ Considers many possibilities

23

What is Programming Like?

- ⊗ It's creative
- ⊗ It's fun
- ⊗ It's an art... you need to practice to get good at it

24

Why?

- ⊗ Programming has all of those characteristics (and more) mainly because of the underlying structure of the computer itself.

25

What does a computer understand?

- ⊗ 0's and 1's (zeros and ones)

Bits and Bit Strings

- ⊗ The 0 or 1 is called a binary digit (bit).
- ⊗ A sequence of bits is called a bit string.
- ⊗ 8 bits together is called a byte
 - ⊗ 1024 bytes = 1 kilobyte (KB)
 - ⊗ 1024 kilobytes = 1 megabyte (MB)
 - ⊗ 1024 megabytes = 1 gigabyte (GB)
 - ⊗ 1024 gigabytes = 1 terabyte (TB)

What do they mean?

- ⊗ 0100101 is a bit string
 - ⊗ What does it mean/represent?

Interpreting Bit Patterns

- ⊗ Letters
- ⊗ Numbers
 - ⊗ Integers (whole numbers)
 - ⊗ Floating point (decimal numbers)
 - ⊗ Why are there two types of numbers?

Encoding machine instructions

- ⊗ Use bits to encode those as well
- ⊗ When we want the machine to follow those instructions:
 - ⊗ Fetch
 - ⊗ Decode
 - ⊗ Execute

Programming Language

- ⊗ Language we can use to write computer programs
- ⊗ Similar to and different from natural language.

31

Similarities to Natural Language

- ⊗ Syntax - *Grammar*
- ⊗ Semantics - *Meaning*
- ⊗ Written down
- ⊗ Read

32

Differences from Natural Language

- ⊗ Rarely spoken

33

Tools

- ⊗ Editor - Place to type the program
- ⊗ Compiler - Translator
- ⊗ Execution Environment
