Have you been so very unhappy you wished you were dead? *no*

Really, well I've noticed some issues you've been dealing with lately...

You have you been showing general_confusion.

You have you been saying wanted_to_end_it_all.

You have you been saying who_cares_if_im_dead and sotiredofitall.

You have you been experiencing loved_one_die and interpersonal_conflict.

Is this generally true? *yes*

I see, this gives reason to believe my prior question...

Have you been so very unhappy you wished you were dead? *yes*

I see, please tell me more about what is going on... *Well, I am failing Chemistry..*

go on... *and recently my girlfriend broke up with me.*

...and how does that make you feel? *I'm pretty low right now..*

That is very difficult to handle.

Will you go with me to see a counselor? *no*

I want you to live. Won't you please stay alive until we can get you some help? *yes*

That's great news, will you make an appointment to see a professional in the next couple of days? *no*

It sounds as if you are not ready to get help at this time, but just know that I am here to help if the feelings and thoughts that you have been having become more intense or if you are ever afraid you might act upon them.
