

Submission of Gars

1. Build your Gar file using `tutorial_build.sh`
2. It will store the gars in `build/lib`
3. Copy the `.gar` file, to `$GLOBUS_LOCATION/studentgars`

```
cp <filename.gar> $GLOBUS_LOCATION/studentgars
```
4. If you need to make changes to your service, once again repeat steps 1-3.
