Project 1: Push-based PoS System

CSE 487/587
Feb 7, 2005
Concepts

- Before we discuss the project design, we breeze through the following concepts:
  - Types of Beans:
    - Entity Bean: Persistence (CMP & BMP)
    - Session Bean: Transience, Stateless & Stateful
    - Message-driven Bean
Design

- You can derive your design from the above or come up with your own.
- It would be nice to just let me know about your design before starting implementation.
- Go through the JRun Programmer’s Guide. (location is posted on the newsgroup)
