The UB Talker brought to you by T3T is a powerful augmentative communication device designed to help a speech-impaired individual communicate efficiently and comfortably. This laptop-based computer with touch-screen input and audio/speaker output capability will make communication for a user of any background or age-group effective and entertaining.

Why choose the UB Talker?

The UB Talker is a highly specialized and carefully developed tool for the speech impaired. It’s many design features include:

• state-of-the-art technology and design

The UB Talker implements modern technology for complex sentence completion and usability.

• highly economical

The UB Talker is affordable and efficient. It is developed for user availability. Unlike other modern augmentative communication devices, this Microsoft-compatible tool offers the user quality and usability, and the price-tag will take the words right out of your mouth.

• completely customizable

The UB Talker boasts the most specialized, user customizable interface of any product on the market today.

The UB Talker is user-friendly!

Menus, icons, keyboards, virtually every aspect of our user interface can be easily modified to suit the needs of the individual. The UB Talker offers powerful communication assistance and a friendly atmosphere appropriate for users of all ages.

• modified keyboard layout is uniquely designed to enhance the user’s ability to communicate quickly and effectively.

• colorful icons highlight an already attractive interface and guide the user along the short path to voicing their thoughts.

• easy navigation allows the user to move freely between menus. A spoken phrase is never more than a handful of button presses away.

• always accessible Emergency Assistance display panel triggers immediate audible output from the Talker at the press of a single button.

Automatic Sentence Completion

The UB Talker features an impressive database of pre-generated words and phrases, allowing the user lightning fast access to thousands of sentences without having to input each word individually.

With only a few letters, The UB Talker compiles a list of popular phrases that will make communication quick and easy for any user.

The UB Talker handles all the work, leaving the user free to concentrate on the conversation!

The UB Talker is fully-customizable

Almost every aspect of the UB Talker can be customized to the individual user through selectable menu options or via our user-friendly administration interface.

• wide variety of vocal tones allow users to add personality and emotion to speech. Speech output settings include gender, age, happy, angry, whisper and many more.

• adjustable interface provides icon settings for any age group and is even extendable to implement other languages.

• phrase and word databases are developed to provide easy access for addition or deletion of vocabulary based on the user’s preferences.
Options include emergency signals for fire, police, and paramedic assistance, as well as a generic cry for help. With the UB Talker, the safety and comfort of the user is key. In stressful situations a call for assistance (or pizza) is always present.

Easy to Understand Interfaces
The UB Talker focuses on ease of use and accommodates users of any age group through its customizable, easy-to-read layout and icons.

Emergency Panel
The UB Talker’s built-in Emergency Assistance panel provides the user with an always available set of options should they require emergency assistance in situations when time is an issue.

At the press of a button the Talker immediately emits audible output according to the option the user selects.
