Windows

Setting up Git

1. Install git bash https://git-scm.com/downloads
2. Open git bash run the following command:
   - ssh-keygen -t rsa -b 4096 -C "your_email@example.com"
   - When you're prompted to "Enter a file in which to save the key", press Enter. Save files to the default location.
   - At the prompt to "Enter a passphrase", type a secure passphrase. You can skip this step if you don't plan to use the keys anywhere just by hitting enter.
3. Login to your Github account. Go to Settings > SSH and GPG keys.
4. Click the button 'New SSH key', add Title to it and paste the content of your public key. Click 'Add SSH key'.
5. Select 'Use SSH keys' option. Upload just generated Public key.
